JOB DESCRIPTION

JOB TITLE:	Laser Operator – Master Production Worker
CLASSIFICATION:	Non-exempt
DEPARTMENT:	Fabrication
REPORTS TO:	Laser Supervisor
SCHEDULE:	Day Shift: Mon – Fri, 6:00 am – 2:30 pm
	Swing Shift: Mon – Fri, 2:30 pm – 11:00 pm

POSITION SUMMARY: This position is responsible for the daily setup and operation of most CNC laser and plasma cutting machines. He/she will also assist other CNC operators with any of their daily duties and help with most operational issues that could arise.

RESPONSIBILITIES:

- 1. Perform daily machine startup and shutdown procedures on CNC cutting equipment.
- 2. Stage raw materials at each work-center for the day's production.
- 3. Load and unload machines.
- 4. Maintain daily dust collector service and associated logbook in assigned area and report equipment deficiencies.
- 5. Ensure production schedule follow through as allocated by the scheduling department.
- 6. Assist in loading and unloading team members' machines when production requires additional manpower to maintain throughput.
- 7. Perform minor maintenance and cleaning of cutting equipment and work area in accordance with company standards and manufactures machine recommendations.
- 8. Perform some machine alignments procedures, optic cleaning to keep equipment at peak operating performance.
- 9. Facilitate work-order paper flow in accordance with TS/ISO quality standards.
- 10. Help with training of new hires on machine functions and shop processes.
- 11. Check parts on other cutting centers per TS/ISO standards.
- 12. Monitoring assist and resonator gas levels and recommend supply requirements for daily production.
- 13. Run multiple machines simultaneously, if required.

QUALIFICATIONS:

1. Three or more years experience operating CO2 laser and/or CNC cutting machines.

- 2. Working experience on multiple brands of CNC machines such as Amada, Mazak, Bystronic, or Messer is highly preferred.
- 3. High school graduate with work experience in laser / plasma cutting field.
- 4. Some drawing and reading comprehension skills.
- 5. Ability to inspect flat laser/plasma cut parts with precision inspection equipment.
- 6. Reading drawings is a necessity and must have some understanding of GD&T drawing notations.
- 7. Possess knowledge of and ability to identify fabrication industry metals.
- 8. Past work experience with CO2 industrial lasers and/or plasma cutting equipment.
- 9. Familiarity with sheet metal flat patterns a plus.
- 10. Ability to learn or have some working knowledge of NC machine code.
- 11. Capable of altering or writing simple programs on the NC control console.
- 12. Accumulation of tools necessary in the facilitation of the trade.
- 13. Ability to follow verbal and written instructions.
- 14. Self sufficient in all areas of responsibility.
- 15. Ability to work well as a team member.
- 16. Understanding and support of Company policies and procedures.
- 17. Safety conscious behavior.
- 18. Excellent attendance.

PHYSICAL REQUIREMENTS:

- 1. Lift, carry, push and or pull 1 50 lbs frequently.
- 2. Squat/kneel, bend/stoop, crawl, twist/turn, grasp and reach overhead and outward frequently.
- 3. Sit, stand and walk for 1 10 hours per day.
- 4. Ability to work in a 55 85 degree Fahrenheit work environment.
- 5. Wear a fit-tested respirator if required.
- 6. Work in a fast paced industrial environment wearing hearing protection, vision protection, hard-hat, steel-toed shoes and other appropriate protective clothing.
